SUMMARY

I am a software engineer with over 6 years of experience in both e-commerce and billing companies. I am experienced in migrating from monolithic to microservices and familiar with the microservices pattern. My expertise lies in PHP, SQL, NoSQL, and K8s, and I am passionate about utilizing my skills to develop innovative and efficient solutions.

EXPERIENCES

Digikala

+2.5 yrs

Senior Software Engineer - Platform team

October 2020 - Present

- Digikala Group is the largest e-commerce platform in the Middle East with over 30 million visitors and 5 million monthly orders.
- As a member of the platform(core) team, responsible for providing the infrastructure for migrating to microservices by bringing new technologies and developing our own customized framework (that is based on Symfony)
- Developed a CQRS service for products that handle more than 3K RPS.
- Configured and integrated the Apache APISIX gateway with our own customized framework.
- Rewrote shopping APIs and refactor legacy codes of digikala.com & digistyle.com resulting in a 40% reduction in resource requests.
- Designed & Developed social e-commerce called Magnet which is like Instagram, and currently has over 1 million users and ~100k posts created per month.
- Participated in onboarding new joiners, hiring process, and revising team structure.
- Main used technologies: **PHP, Symfony, MySQL, Redis, Elasticsearch, Kubernetes, Kafka, APISIX**

Andishe Computer

3 yrs

Backend Software Engineer

September 2017 - October 2020

- Developed a billing system that is used by electricity Companies that handles the data of over 10M Power subscribers from all over the country
- Created subscriber surveillance and bill payment system that has all energy subscriber's data intended to remove bill papers (bargheman.com)
- Structured an automated payment processing system, that gathers financial data from different banks (~2k documents per day) to transmit them to each power distribution and generate financial reports, which removed the need for human work.
- Main used technologies: **Laravel, SQLServer, Docker, MongoDB, Redis, Python, C++**

Behpardaz Pishro

6 mth

Backend Software Engineer

April 2017 - September 2017

- Developed a system ordered by the Ministry of Power for gathering information about 32M subscribers of electricity from all over the country, generating reports on the data.
- Main used technologies: **Laravel, Oracle, MongoDB**

SKILLS

- Proficient in **PHP**
- Proficient in **relational databases (SQL)** and **Database Design**
- Experienced with **Microservices** patterns (**API-GW, SAGA, CQRS**)
- Experienced with **NoSQL** databases (**Redis, MongoDB, Elasticsearch, Memcached**)
- Experienced with **Docker, Kubernetes, Kafka** and **Git**
- Experienced with **Python, Golang**, and **C++**
- Experienced with **Linux** and Server maintenance

EDUCATION

Iran University of Science and Technology

Master of Computer Networks engineering - Second Rank, 17.89 GPA

2016-2018

Iran University of Science and Technology

Bachelor of Computer engineering - Third Rank, 16.85 GPA

2012-2016
